

SOIL TESTING

Optimise Production

Understanding and maintaining your soils health will provide you the foundation needed for sustainable production, increased productivity and healthier higher quality yields.

Improve Nutrient Balance

Alongside testing services Soil Dynamics is also specialised in the creation of custom blends to meet your nutrient and soil amendment needs, including for organic or conventional production.

Save Money

Proper soil and crop nutrition is one of the main determinants of profitable agriculture. With losses commonly occurring due to both over and under fertiliser application.

Why us

Regular soil testing and understanding your soils nutrient levels is an invaluable tool to support your decision making on fertiliser application rates and soil health programmes. Nonetheless, soil tests are only as accurate as the quality and quantity of the samples taken from your fields. Our local consultants are qualified experts with years of experience in the region. We utilise improved sampling methods that allow us to take large accurate composite samples from each of your management zones or problem areas. Saving you both time and money!
